

Michael Nabil Farag

Frontend Developer | React & Next.js

✉ michael.nabil1242@gmail.com ☎ 01080928184 📍 Cairo / Egypt 🌐 GitHub 🔗 LinkedIn

Summary

Engineering graduate who transitioned into frontend development through intensive self-study and hands-on building. In under a year, shipped 3 full-stack-style React applications to production — covering authentication, real-time data, and complex state management. The analytical foundation from engineering accelerates problem-solving and clean architecture decisions. Looking for a junior frontend role to grow fast and contribute immediately

Technical Skills

Languages

HTML5, CSS3, JavaScript (ES6+)

Styling

Tailwind CSS, Styled Components, Responsive Design

Concepts

OOP, Component Architecture, Protected Routes, CRUD, Form Validation

Frameworks

React, Redux Toolkit, Context API, React Router, Next.js

Backend/DB

Supabase, SQL, REST APIs, React Query

Tools

Git, GitHub, Vercel

Projects

The Wild Oasis – Hotel Management Dashboard, *React · React Query · Styled Components · Supabase · REST API*

GitHub [↗](#) · Live Demo [↗](#)

- Full-stack hotel admin dashboard with real-time data via Supabase and React Query caching.
- Implemented secure JWT-based authentication with protected route architecture.
- Built complete CRUD system for cabin inventory and booking management.
- Designed scalable component library using Styled Components with dark/light theme support.

Fast React Pizza – Online Pizza Ordering Platform, *React · Redux Toolkit · Tailwind CSS*

GitHub [↗](#)

- Real-time pizza ordering app with a dynamic cart powered by Redux slices and actions.
- Managed global application state using Redux Toolkit with clean slice/reducer patterns.
- Implemented form validation, user input handling, and fully responsive UI

WorldWise – Travel Tracking Web Application, *React · Context API · useReducer · Leaflet Maps*

GitHub [↗](#)

- Interactive map application allowing users to log visited cities and countries.
- Managed global state using Context API and useReducer following Flux-like patterns.
- Implemented authentication, protected routes, and side-effect handling via React Hooks.

Courses

HTML & CSS Courses, *Elzero Web School*

02/2025 – 04/2025

- Semantic HTML, Flexbox, CSS Grid, responsive design, and accessibility best practices.

JavaScript Course (Online), *Elzero Web School*

05/2025 – 08/2025

- DOM manipulation, event handling, OOP, and dynamic web application development

React – The Ultimate React Course, *(Udemy) – Jonas Schmedtmann*

10/2025 – Present

- Comprehensive course covering React, Redux Toolkit, React Query, Tailwind CSS, Styled Components, Supabase, and Next.js. Building production-level projects with authentication, complex state management, and clean architecture

Education

Bachelor's Degree in Engineering, *Shubra Faculty of Engineering, Benha University*

10/2018 – 05/2023
